

KBC Group NV

Update

Key Rating Drivers

Sound Business Profile: KBC Group NV’s ratings are underpinned by the bank’s leading franchises in commercial banking and insurance in Belgium and the Czech Republic, strong and diversified earnings, solid capitalisation, and sound funding and liquidity. The ratings also incorporate KBC’s operations in less developed and more volatile operating environments in central and eastern Europe (CEE), as well as its conservative risk appetite and sound risk-adjusted profitability.

Strong Franchise in Core Countries: KBC is one of the largest banking groups in Belgium and a market leader in the Czech Republic. The bank also has well-established market footprints in Slovakia, Bulgaria and Hungary. KBC’s stable business model is underpinned by insurance and asset-management franchises, which provide good cross-selling opportunities and revenue diversification, contributing to the group’s strong profitability.

Moderate Risk Appetite: The group’s generally conservative risk appetite is supported by the dominance of its fairly low-risk Belgian operations and stability in its Czech operations. Exposure to some CEE countries could lead to earnings and asset-quality volatility, but these risks should be contained given the strong integration of risk controls and credit standards within the group. Prudent management of insurance risks leads to low risk of potential losses in this business segment.

Stable Asset Quality: Fitch Ratings expects KBC’s impaired loans ratio to be slightly over 2% at end-2025 and end-2026, which compares favourably with Belgian peers’. Asset quality in the bank’s material exposure to CEE countries should hold up well. The impaired loans ratio has improved materially in recent years due to the sale of Irish impaired loans and tightened underwriting. The group’s large SME and corporate lending poses moderate asset-quality risks.

Robust Earnings Generation: KBC’s profitability is a rating strength and compares favourably with that of peers. The group’s earnings generation has been resilient, even with low interest rates, due to its sound revenue and geographical diversification, lower reliance on net interest income than western European peers, integrated bancassurance business, and sound pricing power in its home markets. We expect the operating profit/risk-weighted assets (RWAs) ratio to remain robust at 3.2% in 2025 and to grow slightly in 2026.

Solid Capital Buffers: Capitalisation is strong, underpinned by robust internal capital generation, and is in line with similarly rated peers. We expect KBC’s fully loaded common equity Tier 1 (CET1) ratio to remain close to 15% in 2025, which provides comfortable buffers above its regulatory minimum capital requirements.

Sound Funding and Liquidity: KBC’s funding and liquidity profile is a rating strength, underpinned by a stable and diversified retail and SME deposit franchise base that is the main source of funding. We expect the bank’s consolidated loans/deposits ratio to remain below 90% in 2025 and 2026. All subsidiaries, except for Slovakia, are self-funded. KBC has good access to wholesale funding markets, upcoming maturities are reasonably balanced, and an ample liquidity buffer adequately mitigates refinancing risk.

Ratings Reflect Consolidated Group: Fitch believes that the failure risk of KBC and that of its main subsidiary KBC Bank (90% of group assets) are substantially the same, given the high integration of insurance and banking operations. KBC is the group’s holding company, and its Viability Rating (VR) is equalised with KBC Bank’s VR. The group is regulated on a consolidated basis and holding company double leverage is generally maintained at below 120%. Liquidity is managed centrally and the fungibility of capital is high.

Rating Sensitivities

Factors that Could, Individually or Collectively, Lead to Negative Rating Action/Downgrade

KBC's and KBC Bank's ratings are mainly sensitive to a substantial and durable deterioration in asset quality, translating into erosion of the bank's profitability and capital generation. This could be signalled by an increase in the impaired loans ratio to above 3%, operating profit durably below 3% of RWAs, and our expectation that the group's fully loaded CET1 ratio falls below 14% without prospects of a swift recovery.

An adverse change in KBC's risk appetite could be negative for the ratings, for example, if the contribution of more volatile CEE countries to KBC's earnings grows rapidly, as this could imply an increase in exposure to weaker operating environments.

A potential lowering of the Belgian banks' operating environment score of 'aa-/negative would most likely lead to a revision of KBC's own operating environment by one notch to 'a'. However, the bank's ratings would be unaffected by this.

KBC's ratings could also be downgraded should the holding company's double leverage sustainably rise above 120% without a clear path to reduction, although this is not Fitch's expectation.

Factors that Could, Individually or Collectively, Lead to Positive Rating Action/Upgrade

Upgrades of KBC's and KBC Bank's ratings would require a stabilisation of the operating environment assessment for Belgian banks and for the group. In this scenario, an upgrade would be contingent on a stronger business profile and a structural improvement in asset-quality and capitalisation metrics while maintaining risk appetite and strong profitability.

Other Debt and Issuer Ratings

Rating level	KBC Group NV	KBC Bank NV	KBC IFIMA S.A.
Senior unsecured debt	A/F1	A+/F1	A+/F1
Tier 2 subordinated debt	BBB+	-	-
Additional Tier 1 notes	BBB-	-	-

Source: Fitch Ratings

KBC Group and KBC Bank

KBC Bank's Long-Term Issuer Default Rating (IDR) and long-term senior unsecured debt are rated 'A+', which is one notch above the bank's VR, because Fitch believes the risk of default on senior obligations, as measured by the Long-Term IDR, is lower than the risk of the bank failing, as measured by its VR. The group adopts a single-point-of-entry resolution strategy with bail-in as the preferred resolution tool. KBC is the resolution entity, which meets the group's minimum requirements for own funds and eligible liabilities (MREL). MREL instruments issued by KBC and channelled to KBC Bank rank junior to third-party senior creditors.

KBC's and KBC Bank's Short-Term IDR and short-term senior unsecured debt are rated 'F1'. This is the lower of the two options that map to the respective long-term ratings, reflecting our 'a+' assessment of funding and liquidity.

KBC Bank's Derivative Counterparty Rating is aligned with its Long-Term IDR because, under Belgian legislation, derivative counterparties have no preferential status over other senior obligations in a resolution.

The subordinated Tier 2 debt securities issued by KBC are notched down twice from its VR, reflecting baseline notching for this type of debt under Fitch's criteria.

KBC's additional Tier 1 (AT1) notes are rated four notches below its VR, reflecting poor recoveries of these securities given their deep subordination (two notches) as well as incremental risk of non-performance relative to the VR due to fully discretionary coupons (two notches). Our assessment is based on the bank operating with a CET1 ratio that is comfortably above maximum distributable amount thresholds, and our expectation that this will continue.

KBC IFIMA S.A.

KBC IFIMA S.A.'s senior debt rating is aligned with KBC Bank's IDRs, as the debt is guaranteed by KBC Bank and we believe that KBC Bank will ensure these obligations are met.

Significant Changes from Last Review

KBC's 2024 results were strong, as it remained one of the most profitable large banks in western Europe. The bank's operating profit/RWAs ratio of 3.3% was in line with our expectations, aided by almost 5% higher income. We forecast KBC's operating profit/RWAs ratio to weaken only slightly to 3.2% in 2025, but then to pick up in 2026–2027.

The bank is moderately reliant on net interest income, and we expect its profitability to remain strong despite policy rate cuts. Growing contributions from the insurance business and asset-management fees are main income strengths. We expect net interest income, which increased by 2% in 2024, to improve similarly in 2025, supported by increasing average reinvestment yields in bond portfolios, a gradual migration of savings from term deposits to current accounts, and healthy loan and deposit growth. We expect the growth to remain much faster in CEE, underpinned by low saturation of lending and insurance products.

The group's impaired loans ratio improved to 1.8% at end-2024, mainly due to better asset quality in CEE. We expect the ratio to return to around 2% in 2025–2026, which is a natural level considering KBC's business mix and geographical footprint. Loan impairment charges should reach around 20bp of gross loans in 2025–2027, slightly above the 2024 level (16bp excluding the release of allowances for geopolitical and macroeconomic uncertainties).

KBC will announce its updated dividend policy and capital deployment plan in mid-May 2025. We expect the bank's medium-term fully loaded CET1 ratio to remain strong and comfortably above 14%.

The Key Rating Driver (KRD) weightings used to determine the implied VR are shown as percentages at the top. In cases where the implied VR is adjusted upwards or downwards to arrive at the VR, the KRD associated with the adjustment reason is highlighted in red. The shaded areas indicate the benchmark-implied scores for each KRD.

VR - Adjustments to Key Rating Drivers

The operating environment score of 'a+' is below the 'aa' implied category score and below the 'aa-' score of domestic Belgian banks due to the following adjustment reason: geographical scope (negative).

The asset quality score of 'a-' is above the 'bbb' implied category score due to the following adjustment reason: impaired loan formation (positive).

Higher influence Moderate influence Lower influence

No Government Support

KBC's and KBC Bank's Government Support Rating of 'no support' reflects Fitch's view that senior creditors cannot rely on receiving full extraordinary support from the sovereign in the event that KBC or KBC Bank become non-viable. The EU's Bank Recovery and Resolution Directive and the Single Resolution Mechanism for eurozone banks provide a framework for resolving banks that requires senior creditors participating in losses, if necessary, instead of, or ahead of, a bank receiving sovereign support.

Subsidiaries and Affiliates

Subsidiary Ratings

Rating Level	Kereskedelmi és Hitelbank Zrt (K&H Bank Zrt)	United Bulgarian Bank AD
Long-Term IDR	BBB+/Stable	A-/Positive
Short-Term IDR	F1	F1
Viability Rating	bbb-	bb+
Shareholder Support Rating	bbb+	a-

Source: Fitch Ratings

The IDRs of United Bulgarian Bank AD (UBB) and Kereskedelmi és Hitelbank Zrt (K&H Bank Zrt) are driven by their Shareholder Support Ratings, reflecting Fitch's view of a very high (UBB) and high (K&H) probability of support from their owner, KBC Bank, in case of need.

UBB's Long-Term IDR is capped by Bulgaria's Country Ceiling of 'A-', two notches above the sovereign rating of 'BBB'/Positive. UBB's 'F1' Short-Term IDR is the higher of the two options corresponding to its LT IDR, as we believe transfer and convertibility risks in Bulgaria are materially lower in the short term than in the long term.

K&H's LT IDR of 'BBB+' is capped one notch above the Hungarian sovereign rating of 'BBB'/Stable to reflect the country risks faced by domestic banks, in particular the record of state interventions in the banking system.

The Outlooks on UBB's (Positive) and K&H's (Stable) LT IDRs reflect those on the Bulgarian and Hungarian sovereign, respectively.

UBB's VR is underpinned by its leading domestic franchise and balanced business model, moderate impaired loans, improved profitability, high capital ratios and a stable funding and liquidity profile. UBB has consolidated its position as the largest Bulgarian bank by assets following a merger with KBC Bank Bulgaria in 2023, and has strong market shares of around 20% of loans and deposits. The bank leverages its parent's business model to offer complete services to its client base through banking, insurance and asset management.

K&H's VR recognises the bank's solid franchise as Hungary's third-largest bank, and its good asset quality and resilient performance through the cycle. The assessment also captures the bank's balanced business model and lower risk appetite than domestic peers, although these are not fully insulated from the risks of the Hungarian operating environment. Reasonable capital metrics that could be enhanced by the parent, if needed, and sound deposit-based funding underpin the rating.

Governance (G) Relevance Scores

General Issues	G Score	Sector-Specific Issues	Reference	G Relevance	<p>CREDIT-RELEVANT ESG SCALE</p> <p>How relevant are E, S and G issues to the overall credit rating?</p>	
Management Strategy	3	Operational implementation of strategy	Business Profile (incl. Management & governance)	5	5	Highly relevant, a key rating driver that has a significant impact on the rating on an individual basis. Equivalent to "higher" relative importance within Navigator.
Governance Structure	3	Board independence and effectiveness; ownership concentration; protection of creditor/stakeholder rights; legal /compliance risks; business continuity; key person risk; related party transactions	Business Profile (incl. Management & governance); Earnings & Profitability; Capitalisation & Leverage	4	4	Relevant to rating, not a key rating driver but has an impact on the rating in combination with other factors. Equivalent to "moderate" relative importance within Navigator.
Group Structure	3	Organizational structure; appropriateness relative to business model; opacity; intra-group dynamics; ownership	Business Profile (incl. Management & governance)	3	3	Minimally relevant to rating, either very low impact or actively managed in a way that results in no impact on the entity rating. Equivalent to "lower" relative importance within Navigator.
Financial Transparency	3	Quality and frequency of financial reporting and auditing processes	Business Profile (incl. Management & governance)	2	2	Irrelevant to the entity rating but relevant to the sector.
				1	1	Irrelevant to the entity rating and irrelevant to the sector.

The highest level of ESG credit relevance is a score of '3', unless otherwise disclosed in this section. A score of '3' means ESG issues are credit neutral or have only a minimal credit impact on the entity, either due to their nature or the way in which they are being managed by the entity. Fitch's ESG Relevance Scores are not inputs in the rating process; they are an observation on the relevance and materiality of ESG factors in the rating decision. For more information on Fitch's ESG Relevance Scores, visit <https://www.fitchratings.com/topics/esg/products#esg-relevance-scores>.

SOLICITATION & PARTICIPATION STATUS

Details of permissible or ancillary service(s) for which the lead analyst is based in an ESMA- or FCA-registered Fitch Ratings company (or branch of such a company) can be found on the entity summary page for this issuer on the Fitch Ratings website.

In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed. Fitch Ratings makes routine, commonly-accepted adjustments to reported financial data in accordance with the relevant criteria and/or industry standards to provide financial metric consistency for entities in the same sector or asset class.

The information in this report is provided "as is" without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$10,000 to US\$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.

For Australia, New Zealand, Taiwan and South Korea only: Fitch Australia Pty Ltd holds an Australian financial services license (AFS license no. 337123) which authorizes it to provide credit ratings to wholesale clients only. Credit ratings information published by Fitch is not intended to be used by persons who are retail clients within the meaning of the Corporations Act 2001.

Fitch Ratings, Inc. is registered with the U.S. Securities and Exchange Commission as a Nationally Recognized Statistical Rating Organization (the "NRSRO"). While certain of the NRSRO's credit rating subsidiaries are listed on Item 3 of Form NRSRO and as such are authorized to issue credit ratings on behalf of the NRSRO (see <https://www.fitchratings.com/site/regulatory>), other credit rating subsidiaries are not listed on Form NRSRO (the "non-NRSROs") and therefore credit ratings issued by those subsidiaries are not issued on behalf of the NRSRO. However, non-NRSRO personnel may participate in determining credit ratings issued by or on behalf of the NRSRO.
